NADIA BRENNAN-AZIZ

Cloud Infrastructure / Platform Engineer

Manchester, UK | nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Cloud infrastructure and platform engineer with 10 years of infrastructure experience, including 6 years operating Kubernetes platforms on AWS. Experienced in designing and running cloud environments, building Terraform-managed infrastructure, and leading platform initiatives from implementation through production. Focused on reliable, observable platforms and self-service infrastructure that helps product teams deploy and operate services effectively.

CORE SKILLS

Cloud and infrastructure: AWS (EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront), Terraform, Atlantis, Kubernetes, Linux, Puppet

Platform and delivery: Helm, Kustomize, Argo CD, Crossplane, Karpenter, GitHub Actions

Reliability and observability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs and error budgets, incident management

Programming and testing: Go, Python, Bash, k6

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd (B2B accounting SaaS) Manchester / remote | Apr 2022 – Present

- Technical lead for a five-person platform team, operating an AWS EKS platform of 8 clusters and approximately 350 services across 3 regions.
- Built an internal developer platform with service templates, Argo CD GitOps, and Crossplane self-service provisioning for RDS, SQS, and S3; reduced the time to take a new service to production from approximately 2 weeks to under 1 day.
- Introduced SLOs and error budgets for the 20 most critical services, reducing on-call pages per week by approximately 60%.
- Moved node provisioning to Karpenter with spot instances, reducing EC2 spend by 38%.
- Serve in the incident commander rotation and established the incident and post-mortem process.

Site Reliability Engineer | Brightwater Games Leeds | Jan 2019 – Mar 2022

- Operated AWS game backend infrastructure using EC2, ECS, and later EKS for titles with up to 1.2 million daily active players.
- Managed AWS infrastructure as code with approximately 40 Terraform modules and used Atlantis for pull-request-based plan and apply workflows.
- Replaced a noisy Nagios setup with a Prometheus, Grafana, Alertmanager, and Loki observability stack.
- Conducted pre-launch load testing with k6 and supported launch-day capacity planning.

Linux Systems Engineer | Pennine Hosting Sheffield | Jul 2016 – Dec 2018

- Managed approximately 600 Linux servers for hosting customers using Puppet configuration management.
- Automated infrastructure tasks with Bash and Python and provided on-call support for customer incidents.

EDUCATION

BSc Computer Science | University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021; renewed 2024
AWS Certified Solutions Architect – Professional | 2023
