Tobias Mwangi-Hartley

Data Scientist | Applied Machine Learning

Email: tobias.mwangihartley@example.com | Phone: +44 7700 900110 | LinkedIn: linkedin.com/in/tmh-example

PROFILE

Data scientist with 6 years of experience in analytics and data science. Strong foundation in statistics and Python, with experience developing forecasting and churn propensity models. Builds analyses and models that inform operational and customer decisions, and communicates results clearly to business stakeholders. Interested in moving towards machine learning engineering.

EXPERIENCE

Data Scientist | Thistlebox (meal-kit subscriptions) *Feb 2022–Present*

- Built a weekly per-recipe demand forecasting model using LightGBM and calendar features. The model is used by operations to order ingredients; WAPE decreased from 23% to 14%, and food waste fell by an estimated 9%.
- Developed a churn propensity model using XGBoost to target retention offers, with uplift validated using a holdout.
- Design and analyse approximately 40 A/B tests per year for growth and product teams; built the team's sequential testing calculator.
- Write production SQL in BigQuery and maintain dbt models for the analytics layer.
- Present results to leadership monthly.

Junior Data Analyst | Firth Energy Retail | Glasgow *Sep 2020–Jan 2022*

- Conducted customer segmentation and tariff analysis using R and SQL.
- Automated monthly regulator reports using R Markdown.

EDUCATION

MSc Statistics | University of the Lothians | 2020 | Distinction

Dissertation: Bayesian hierarchical models for small-area energy demand

BSc Mathematics | University of the Lothians | 2019

SKILLS

Programming and data: Python (pandas, scikit-learn, LightGBM, XGBoost, statsmodels), R (tidyverse, brms), SQL (BigQuery)
Data and engineering tools: dbt, Git, Jupyter, Looker
Machine learning and analytics: Demand forecasting, churn propensity modelling, A/B testing, causal inference, time-series forecasting, Bayesian statistics

LANGUAGES

English (native) | Swahili (conversational)
