LENA VARGA-HOLM

Senior Data Engineer
lena.vargaholm@example.com | +385 55 555 0101 | github.com/lvh-data-example

PROFESSIONAL SUMMARY

Senior Data Engineer with 9 years of experience building and operating batch and streaming data platforms for e-commerce, payments and logistics. Experienced in owning data platform ingestion, developing reusable pipelines with Airflow and dbt, and improving data quality through testing and data contracts. Built production systems processing approximately 30 million events per day and 1.2 TB of raw files daily.

SKILLS

Languages: Python, SQL, Bash
Data platforms and engineering: Airflow, dbt, PySpark, Kafka, Kafka Connect, Snowflake, Redshift, PostgreSQL, Great Expectations
Cloud and infrastructure: AWS (S3, EMR, Glue, Lambda, IAM), Docker, Terraform (basic), GitHub Actions
Data and BI: Dimensional modelling, data quality, data contracts, Power BI, Looker (basic)

EXPERIENCE

Senior Data Engineer | Lukovac Freight Hub d.o.o. (logistics marketplace) | 03/2022 - Present

- Own the ingestion layer of the company data platform, maintaining approximately 140 Airflow DAGs that load from Postgres, MySQL, Salesforce and third-party APIs into Snowflake.
- Migrated transformation logic from stored procedures to dbt, building 420+ models with tests on every model; reduced nightly run time from 5 hours 10 minutes to 1 hour 35 minutes.
- Introduced JSON Schema data contracts and CI checks between product teams and the data team, reducing broken-pipeline incidents from approximately 9 per month to 2 per month.
- Built a Kafka-based event pipeline using Kafka Connect and Snowpipe Streaming for shipment tracking, processing approximately 30 million events per day.
- Mentor two mid-level data engineers and run weekly data platform office hours.

Data Engineer | Kovalent Pay (payments startup) | 09/2019 - 02/2022

- Built PySpark jobs on AWS EMR for transaction reconciliation, processing approximately 1.2 TB of raw files from S3 daily.
- Designed a Redshift dimensional warehouse schema with 30+ fact and dimension tables for finance and risk teams.
- Implemented Great Expectations data quality checks on critical finance tables.
- Developed an internal Python library for S3 and Glue catalog access, adopted by four teams.

Junior Data Engineer / BI Developer | Adria Retail Group | 06/2017 - 08/2019

- Maintained SSIS packages and T-SQL ETL processes for an on-premises SQL Server warehouse.
- Built Power BI reports for store operations across 40+ stores.
- Migrated 60 nightly SSIS jobs to Python scripts scheduled with cron.

EDUCATION

MSc Computer Science (Data Science track) | Northgate Technical University | 2017
Thesis: Incremental materialized views for analytical queries
