Aiyana Brooks-Tan

Full-Stack / Frontend Engineer | React, TypeScript, Node.js

PROFESSIONAL SUMMARY

Third-year Computing student at Liffey Institute of Technology with hands-on experience building accessible web applications using React and TypeScript. Developed React features during a software development internship and delivered projects spanning Node.js/Express APIs, PostgreSQL, automated testing, and Next.js. Tested accessible interfaces with NVDA and VoiceOver; Tidewatch achieved a Lighthouse accessibility score of 100.

EXPERIENCE

Software Development Intern | Harbourline Media | May 2024 - Aug 2024

- Implemented accessibility fixes and React components for a news site.
- Built a keyboard- and screen-reader-friendly image gallery for article pages and documented it in Storybook.

Freelance Web Developer | 2025

- Built marketing pages and a class timetable for a yoga studio, with booking requests sent by email.
- Used Next.js static generation, React, and Tailwind CSS; content was edited in Markdown files and the site was deployed on Vercel.

Teaching Assistant, First-Year Web Development Lab | Spring 2025

- Helped approximately 30 students over one semester.

PROJECTS

Tidewatch | Final Year Project | 2024-2025

- Built an accessible web app showing tides, water temperature, and weather for sea swimmers around the Irish coast.
- Developed a React and TypeScript frontend and a Node.js/Express API that caches data from public weather and tide APIs; used PostgreSQL for user favourites.
- Tested with NVDA and VoiceOver; achieved a Lighthouse accessibility score of 100.
- Earned a grade of 82% (First Class) and presented the project at the college project showcase.
- Technologies: React, TypeScript, Node.js, Express, PostgreSQL, Chart.js, Jest.

Study Buddy | Group Project | 2023

- Worked in a team of four to build a web app matching classmates for study sessions.
- Built the React frontend and login screens; other team members developed the API and database.
- Technologies: React, JavaScript, Firebase Authentication.

Student Hackathon | 2024

- Won second place as part of a three-person team that built a transit delay notifier in 24 hours.
- Developed the frontend.

SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Tailwind CSS
Backend and data: Node.js, Express, PostgreSQL, Firebase Authentication
Testing and accessibility: Jest, React Testing Library, NVDA, VoiceOver, keyboard accessibility, Storybook
Other technologies: Chart.js, Vercel, Markdown

EDUCATION

Computing | Liffey Institute of Technology | Third-year student
