LENA VARGA-HOLM

Senior Data Engineer

lena.vargaholm@example.com | +385 55 555 0101 | github.com/lvh-data-example

PROFESSIONAL SUMMARY

Data engineer with 9 years of experience building batch and streaming data platforms across logistics, payments and retail. Hands-on experience with Airflow, dbt, Python, SQL and cloud data warehouses, including Snowflake and Redshift. Combines production platform ownership with reusable tooling, dimensional modelling and automated data quality standards. Delivered faster transformations and more reliable pipelines through testing and data contracts.

EXPERIENCE

Senior Data Engineer | Lukovac Freight Hub d.o.o. (logistics marketplace)
03/2022 - present

- Own the data platform ingestion layer: approximately 140 Airflow DAGs loading PostgreSQL, MySQL, Salesforce and third-party API data into Snowflake.
- Migrated transformation logic from stored procedures to dbt, with 420+ models and tests on every model; reduced nightly runtime from 5h10 to 1h35.
- Introduced data contracts between product teams and the data team using JSON Schema and CI checks, reducing broken-pipeline incidents from approximately 9 per month to 2 per month.
- Built a Kafka-based streaming pipeline using Kafka Connect and Snowpipe Streaming for approximately 30 million shipment tracking events per day.
- Mentor two mid-level data engineers and run weekly data platform office hours.

Data Engineer | Kovalent Pay (payments startup)
09/2019 - 02/2022

- Built PySpark jobs on AWS EMR for transaction reconciliation, processing approximately 1.2 TB of raw files from S3 daily.
- Designed a Redshift warehouse using dimensional modelling: a star schema with 30+ fact and dimension tables used by finance and risk.
- Implemented Great Expectations data quality checks on critical finance tables.
- Developed a reusable internal Python library for S3 and Glue catalog access, used by four teams.

Junior Data Engineer / BI Developer | Adria Retail Group
06/2017 - 08/2019

- Maintained SSIS packages and T-SQL ETL into an on-premises SQL Server warehouse.
- Built Power BI reports for store operations across 40+ stores.
- Migrated 60 nightly SSIS jobs to Python scripts scheduled with cron.

EDUCATION

MSc Computer Science (Data Science track) | Northgate Technical University | 2017
Thesis: Incremental materialized views for analytical queries

SKILLS

Programming: Python, SQL, Bash
Orchestration and transformation: Airflow, dbt, Spark (PySpark), SSIS
Streaming: Kafka, Kafka Connect, Snowpipe Streaming
Data warehouses and databases: Snowflake, Redshift, PostgreSQL, MySQL, SQL Server
Data modelling and quality: Dimensional modelling, star schemas, Great Expectations, JSON

Schema, data contracts, automated tests
Cloud and engineering: AWS (S3, EMR, Glue, Lambda, IAM), Docker, GitHub Actions, CI checks, Terraform (basic)
Business intelligence: Power BI, Looker (basic)

LANGUAGES

Croatian (native), English (C1), German (B1)
