Samuel Achterberg-Osei

Cloud Engineer | Azure Infrastructure | DevOps

Professional Summary

Cloud engineer with hands-on experience designing and operating Azure infrastructure, maintaining Terraform modules and automating deployments with Azure DevOps. Background in Windows and Linux systems administration, cloud migration and PowerShell automation. Delivered hub-spoke networking across three Azure subscriptions and deployment pipelines for 15 internal applications. Led a 60-server migration to Azure with no unplanned downtime.

Professional Experience

Cloud Engineer (contract) | Havenstad Logistics

2025–Present

- Built Azure landing zone networking in Terraform: hub-spoke topology, Azure Firewall, private DNS zones, private endpoints for storage and SQL, and VNet peering across three subscriptions.
- Added Terraform module tests using Terratest in the pipeline and a nightly drift detection job.
- Replaced manual deployments for 15 internal .NET and Node applications with Azure DevOps YAML pipelines covering build, test and deployment to App Service or AKS.
- Increased deployment frequency from roughly monthly to several times per week for most applications.
- Operate AKS clusters, including upgrades, node pools and ingress; application manifests are owned by developers.
- Work with Docker and Helm in application delivery pipelines.

Freelance IT Services

2022–2023

- Created a repeatable Microsoft 365 security baseline for small-business clients using PowerShell and a checklist.
- Enabled MFA, conditional access, mailbox auditing and backups using Microsoft 365 and Entra ID.

Systems Administrator | Maasbrug Gemeente IT Services

2014–2020

- Administered approximately 250 Windows and Linux servers and supported staff across several municipal services.
- Led the planning and execution of a lift-and-shift migration of 60 servers from VMware to Azure IaaS in 2019 using Azure Migrate.
- Completed cut-over over six weekends with no unplanned downtime, using Azure VMs, VNets and site-to-site VPN connectivity.
- Automated repetitive administration tasks with PowerShell.

Technical Skills

- Cloud infrastructure: Microsoft Azure, Azure landing zones, Azure VMs, App Service, Azure Migrate.
- Infrastructure as code: Terraform modules, Terratest module testing, nightly drift detection; Go limited to Terratest tests.
- CI/CD and containers: Azure DevOps YAML pipelines, Docker, Helm; AKS operations including upgrades, node pools and ingress.
- Network design and security: hub-spoke networking, Azure Firewall, VNet peering, private DNS, private endpoints, site-to-site VPN, MFA and conditional access.
- Systems and scripting: Windows Server, Linux, VMware, PowerShell; Python for small scripts and reading code.

Certifications

- Microsoft Certified: Azure Administrator Associate.
- HashiCorp Certified: Terraform Associate, 2025.

Professional Development

- Completed a three-month, part-time online cloud bootcamp delivered in English, December 2024.
- Built a Proxmox homelab and studied Terraform during a career break.

Career Breaks

- February 2024–February 2025: Career break following a period without contract work; focused on Terraform study, a Proxmox homelab and cloud training.
- March 2020–August 2022: Full-time family caregiving; maintained AZ-104 knowledge and provided unpaid IT help to church and family.
