NADIA BRENNAN-AZIZ

Senior Site Reliability / Platform Engineer

nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior infrastructure engineer with 10 years of experience, including 6 years running Kubernetes platforms on AWS. Technical lead experienced in cloud infrastructure design and operation, Terraform infrastructure-as-code, and self-service platforms that help backend developers deploy and operate services. Delivered measurable improvements in deployment speed, reliability and infrastructure cost through GitOps, observability, SLOs and incident management.

EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd (B2B accounting SaaS)
Apr 2022 - present

- Technical lead of a 5-person platform team, running an AWS EKS platform spanning 8 clusters, approximately 350 services and 3 regions.
- Built an internal developer platform with service templates, Argo CD GitOps and Crossplane-based self-service provisioning for RDS, SQS and S3; reduced time from new service to production from approximately 2 weeks to under 1 day.
- Introduced SLOs and error budgets for the 20 most critical services, reducing weekly on-call pages by approximately 60%.
- Moved node provisioning to Karpenter with spot instances, reducing EC2 spend by 38%.
- Served in the incident commander rotation and wrote the incident and post-mortem process.

Site Reliability Engineer | Brightwater Games
Jan 2019 - Mar 2022

- Operated AWS backend infrastructure using EC2, ECS and subsequently EKS for games with up to 1.2 million daily active players.
- Managed all AWS infrastructure through Terraform, with approximately 40 modules and Atlantis for pull-request-based plan and apply workflows.
- Replaced a noisy Nagios setup with a Prometheus, Grafana, Alertmanager and Loki observability stack.
- Used k6 for pre-launch load testing and carried out launch-day capacity planning.

Linux Systems Engineer | Pennine Hosting
Jul 2016 - Dec 2018

- Managed approximately 600 Linux servers for hosting customers using Puppet configuration management.
- Automated operations with Bash and Python and provided on-call support for customer incidents.

TECHNICAL SKILLS

Cloud infrastructure: AWS, EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront

Infrastructure as code and automation: Terraform, Atlantis, Crossplane, Puppet, GitHub Actions

Containers and deployment: Kubernetes, Helm, Kustomize, Argo CD, Karpenter, GitOps

Observability and reliability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs, error budgets, incident management, k6, capacity planning

Programming and systems: Go, Python, Bash, Linux

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) - 2021, renewed 2024

AWS Certified Solutions Architect - Professional - 2023

EDUCATION

BSc Computer Science | University of the North Moors | 2016

LANGUAGES

English (native), Urdu (conversational)
