AIYANA BROOKS-TAN

PROFESSIONAL SUMMARY

Computing student with a software development internship and hands-on academic and freelance experience building web applications with React and TypeScript, including an internship focused on accessibility and a full-stack academic project using Node.js, Express and PostgreSQL. Interested in creating accessible, user-focused web experiences. Experience also includes teaching support for first-year web development students.

TECHNICAL SKILLS

Demonstrated in Experience and Projects:
Frontend: React, TypeScript, JavaScript, Next.js, Tailwind CSS
Backend and data: Node.js, Express, PostgreSQL, Firebase Authentication
Testing and documentation: Jest, React Testing Library, Storybook
Other: Chart.js, Vercel

EXPERIENCE

Software Development Intern | Harbourline Media *May 2024 – August 2024*

- Worked on accessibility fixes and components for a React news site.
- Built a keyboard- and screen-reader-friendly image gallery for article pages using React; documented the component in Storybook and used Jest and React Testing Library.

Teaching Assistant, First-Year Web Development Lab | Spring 2025

- Supported approximately 30 first-year students during one semester of web development lab sessions.

Freelance Web Developer | 2025

- Built and deployed a yoga studio website with marketing pages, a class timetable, and email-based booking requests using Next.js static generation, Tailwind CSS, Markdown content, and Vercel.

ADDITIONAL EXPERIENCE

Part-Time Barista | Throughout college

- Worked part-time alongside college studies.

SELECTED PROJECTS

Tidewatch | Final Year Project *2024–2025*

- Built an accessible web app for sea swimmers showing tides, water temperature and weather around the Irish coast.
- Developed the React and TypeScript frontend and a Node.js and Express API, caching data from public weather and tide APIs.
- Used PostgreSQL to store user favourites; used Chart.js for visualisations and Jest for testing.
- Tested with NVDA and VoiceOver; achieved a Lighthouse accessibility score of 100.
- Awarded 82% (First Class) and demonstrated the project at the college project showcase.

Transit Delay Notifier | Student Hackathon *2024*

- Worked in a three-person team to build a transit delay notifier in 24 hours; developed the frontend.
- Placed second in the student hackathon.

Study Buddy | Group Project *2023*

- Built the React frontend and login screens for a web app matching classmates for study sessions as part of a four-person team.

- Used React, JavaScript and Firebase Authentication; other team members developed the API and database.

VOLUNTEERING

Social Media Volunteer | Sea Swimming Club

- Run social media for a sea swimming club.

EDUCATION

Computing | Liffey Institute of Technology
