Tobias Mwangi-Hartley

Data Scientist

Edinburgh, UK | tobias.mwangihartley@example.com | +44 7700 900110
linkedin.com/in/tmh-example

Professional Summary

Data scientist with six years in analytics and data science, including over four years as a data scientist, now moving towards machine learning engineering. Builds forecasting and customer propensity models used in operational and retention decisions. Combines Python, feature engineering, production SQL in BigQuery and dbt with rigorous model evaluation, experimentation and clear communication of business impact.

Experience

Data Scientist | Thistlebox (meal-kit subscriptions), Edinburgh
Feb 2022 - present

- Built a weekly recipe-level demand forecasting model using LightGBM and calendar features, used by operations to order ingredients. Reduced forecast error (WAPE) from 23% to 14%, with an estimated 9% reduction in food waste.
- Built an XGBoost churn propensity model used to target retention offers; validated uplift with a holdout.
- Write production SQL in BigQuery and maintain dbt models for the analytics layer.
- Design and analyse approximately 40 A/B tests annually for growth and product teams; built the team's sequential testing calculator.
- Present results to leadership monthly, translating statistical findings into actionable business insights.

Junior Data Analyst | Firth Energy Retail, Glasgow
Sep 2020 - Jan 2022

- Conducted customer segmentation and tariff analysis using R and SQL.
- Automated monthly regulator reports using R Markdown.

Education

MSc Statistics | University of the Lothians | 2020
Distinction
Dissertation: Bayesian hierarchical models for small-area energy demand

BSc Mathematics | University of the Lothians | 2019

Skills

Programming: Python (pandas, scikit-learn, LightGBM, XGBoost, statsmodels), R (tidyverse, brms), SQL
Data and tools: BigQuery, dbt, Git, Jupyter, Looker
Machine learning and statistics: Feature engineering, time-series forecasting, customer segmentation, churn modelling, model evaluation, A/B testing, causal inference, Bayesian statistics

Languages

English (native), Swahili (conversational)
