PROFESSIONAL SUMMARY

Computing graduate and frontend developer with experience building React and Next.js web applications. Skilled in TypeScript, accessibility improvements, reusable components and automated unit testing. Technical skills also include Node.js, Express and PostgreSQL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Storybook, Figma

Backend and databases: Node.js, Express, PostgreSQL

Testing and tools: Jest, React Testing Library, Git/GitHub

Accessibility: WCAG 2.1

EXPERIENCE

Frontend Developer (part-time, freelance) | Self-employed

Oct 2025–Present

- Built a booking website for a local yoga studio using Next.js and Tailwind CSS, hosted on Vercel.
- Made small updates to two WordPress sites.

Software Development Intern | Harbourline Media, Dublin

May 2024–Aug 2024

- Contributed to the company's React news site as part of the web team.
- Fixed accessibility issues identified in an audit, including keyboard navigation, colour contrast and ARIA labels, across 20+ components.
- Built a reusable image gallery component and created Storybook stories for it.
- Wrote unit tests using Jest and React Testing Library.

Barista | Corner Bean Cafe, Dublin

2021–2025 | Part-time during studies

EDUCATION

BSc (Hons) Computing – Software Development | Liffey Institute of Technology

2021–2025 | First Class Honours

- Final-year project: "Tidewatch," an accessible tide and weather app for sea swimmers, built with React, TypeScript and Node.js.
- Relevant modules: Web Development, Databases, Human-Computer Interaction, Software Testing, Data Structures & Algorithms.

LANGUAGES

English (native) | Mandarin (conversational)

COVER LETTER

Dear Verdane Care Hiring Team,

I am applying for the Full-Stack Engineer role on the Patient Experience team. I am a computing graduate with hands-on experience building React applications, improving accessibility, creating reusable components and writing automated unit tests. Verdane Care's focus on accessible, human-centred healthcare software makes this role especially compelling to me.

During my internship with Harbourline Media, I contributed to a React news site and resolved accessibility audit findings across more than 20 components, including keyboard navigation, colour contrast and ARIA labels. I also built a reusable image gallery, documented it with Storybook stories, and wrote tests with Jest and React Testing Library. More recently, I built a booking website for a local yoga studio using Next.js and Tailwind CSS. These experiences align with the role's emphasis on accessible patient-facing features and reliable web experiences.

My technical background also includes TypeScript, Node.js, Express and PostgreSQL. For my final-year project, I built Tidewatch, an accessible tide and weather app for sea swimmers using React, TypeScript and Node.js. I am drawn to Verdane Care's principles of "Patients first," "Privacy by default" and "Simple beats clever," and to the opportunity to contribute to products that help patients manage appointments, forms and follow-up care.

Thank you for considering my application. I would welcome the opportunity to discuss how my frontend experience, accessibility work and technical foundation could contribute to Verdane Care's Patient Experience team.

Kind regards,

Aiyana Brooks-Tan
