NADIA BRENNAN-AZIZ

Senior Cloud Infrastructure / Platform Engineer

Manchester, UK | nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

SUMMARY

Senior Site Reliability / Platform Engineer with cloud infrastructure experience and 10 years of infrastructure experience, including 6 years operating Kubernetes platforms on AWS. Strong experience in SLOs, error budgets and incident response, including incident commander rotation and clear incident processes. Experienced in AWS infrastructure operation, infrastructure as code, Kubernetes platform engineering and self-service platforms. Technical lead who helps product teams deliver reliable, observable services through sensible platform defaults.

CORE SKILLS

Cloud infrastructure and platform engineering: AWS, Kubernetes, Linux
Infrastructure as code and platform engineering: Terraform, Atlantis, Crossplane, Argo CD, Helm, Kustomize, Karpenter
Reliability and observability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs and error budgets, incident management
Automation and testing: Go, Python, Bash, GitHub Actions, Puppet, k6

EXPERIENCE

Senior Platform Engineer - Tallybrook Ltd, Manchester / remote *Apr 2022 - present*

- Introduced SLOs and error budgets for the 20 most critical services, reducing on-call pages per week by approximately 60%.
- Participate in the incident commander rotation and wrote the incident and post-mortem process.
- Technical lead for a 5-person platform team operating an AWS EKS platform of 8 clusters and approximately 350 services across 3 regions.
- Built an internal developer platform with service templates, Argo CD GitOps and Crossplane-based self-service provisioning for RDS, SQS and S3; reduced the time to take a new service to production from approximately 2 weeks to under 1 day.
- Moved node provisioning to Karpenter with spot instances, reducing EC2 spend by 38%.

Site Reliability Engineer - Brightwater Games, Leeds *Jan 2019 - Mar 2022*

- Operated AWS game-backend infrastructure using EC2, ECS and then EKS.
- Managed AWS infrastructure as code with approximately 40 Terraform modules; used Atlantis to run plan and apply workflows on pull requests.
- Replaced a noisy Nagios setup with a Prometheus, Grafana, Alertmanager and Loki observability stack.
- Used k6 for pre-launch load testing and supported launch-day capacity planning.

Linux Systems Engineer - Pennine Hosting, Sheffield *Jul 2016 - Dec 2018*

- Managed approximately 600 Linux servers for hosting customers using Puppet configuration management.
- Automated tasks with Bash and Python and provided on-call support for customer incidents.

EDUCATION

BSc Computer Science, University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021, renewed 2024
AWS Certified Solutions Architect - Professional | 2023

LANGUAGES

English (native), Urdu (conversational)
