NADIA BRENNAN-AZIZ

Cloud Infrastructure / Senior Platform Engineer

Manchester, UK | nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior infrastructure and platform engineer with 10 years of experience, including six years running Kubernetes platforms on AWS. Experienced in designing, building and operating cloud infrastructure, infrastructure as code, and reliable platforms for product teams. Technical lead with a focus on self-service infrastructure, observable services, practical operational processes and measurable improvements to deployment speed and reliability.

CORE SKILLS

Cloud infrastructure and operations: AWS (EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront), Kubernetes, Linux
Infrastructure as code and platform engineering: Terraform, Atlantis, Crossplane, Argo CD, Helm, Kustomize, Karpenter, Puppet
Reliability and observability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs and error budgets, incident management
Automation and testing: Go, Python, Bash, GitHub Actions, k6

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd (B2B accounting SaaS)
Manchester / remote — Apr 2022 – Present

- Technical lead of a five-person platform team operating an AWS EKS platform spanning eight clusters, approximately 350 services and three regions.
- Built an internal developer platform with service templates, Argo CD GitOps and Crossplane-based self-service provisioning for RDS, SQS and S3; reduced the time to take a new service to production from approximately two weeks to under one day.
- Introduced SLOs and error budgets for the 20 most critical services, reducing on-call pages per week by approximately 60%.
- Moved node provisioning to Karpenter with spot instances, reducing EC2 spend by 38%.
- Participate in the incident commander rotation and established the incident and post-mortem process.

Site Reliability Engineer | Brightwater Games
Leeds — Jan 2019 – Mar 2022

- Operated AWS game-backend infrastructure across EC2, ECS and later EKS for titles with up to 1.2 million daily active players.
- Managed AWS infrastructure as code in Terraform across approximately 40 modules, using Atlantis for plan and apply workflows on pull requests.
- Replaced a noisy Nagios setup with a Prometheus, Grafana, Alertmanager and Loki observability stack.
- Conducted pre-launch load testing with k6 and supported launch-day capacity planning.

Linux Systems Engineer | Pennine Hosting
Sheffield — Jul 2016 – Dec 2018

- Managed approximately 600 Linux servers for hosting customers using Puppet configuration management.
- Automated operational work with Bash and Python and provided on-call support for customer incidents.

EDUCATION

BSc Computer Science | University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021; renewed 2024
AWS Certified Solutions Architect – Professional | 2023
