Tobias Mwangi-Hartley

Data Scientist

Edinburgh, UK | tobias.mwangihartley@example.com | +44 7700 900110 | linkedin.com/in/tmh-example

PROFESSIONAL SUMMARY

Data scientist with six years in analytics and data science, including over four years as a data scientist. Experience building forecasting and churn models, engineering features, and delivering scheduled scoring workflows with Python and BigQuery. Strong statistical background in experimentation and model evaluation, with growing experience in automated testing and an interest in machine learning engineering.

EXPERIENCE

Data Scientist | Thistlebox, meal-kit subscriptions | Edinburgh
Feb 2022–Present

- Built a LightGBM model to forecast weekly recipe demand by region six weeks ahead, using calendar, price and menu-position features. Reduced WAPE from 23% to 14% and food waste by an estimated 9%.
- Run the forecasting model as a scheduled Vertex AI Workbench notebook that writes to BigQuery for operations teams to use in Looker. Added pytest unit tests for forecasting feature code, reaching approximately 60% coverage.
- Built an XGBoost churn propensity model scored weekly in BigQuery to target retention offers. A 10% holdout showed a 2.1 percentage-point reduction in churn in the treated group.
- Write production SQL in BigQuery and maintain dbt models for the analytics layer.
- Built a Python and Streamlit sequential A/B testing calculator used by approximately 25 product and growth colleagues. Wrote the Dockerfile; the data platform team hosts and deploys the app on Cloud Run.
- Design and analyse approximately 40 A/B tests per year for product and growth teams. Present results to leadership monthly and delivered internal “Stats for PMs” training three times.

Junior Data Analyst | Firth Energy Retail | Glasgow
Sep 2020–Jan 2022

- Analysed customer segments and tariffs using R and SQL.
- Automated monthly regulator reports with R Markdown, saving the team approximately two days each month.

PROJECT

Image Classification Course Project | Personal | 2025

- Fine-tuned a small convolutional neural network in PyTorch on a public food images dataset as part of an online deep learning course, achieving approximately 80% accuracy.

EDUCATION

MSc Statistics, Distinction | University of the Lothians | 2020
Dissertation: Bayesian hierarchical models for small-area energy demand

BSc Mathematics | University of the Lothians | 2019

SKILLS

Programming and tools: Python (pandas, scikit-learn, LightGBM, XGBoost, statsmodels, PyTorch), R (tidyverse, brms), SQL (BigQuery), dbt, Git, pytest, Jupyter, Streamlit, Docker, Vertex AI Workbench, Looker
Methods: Feature engineering, time-series forecasting, customer analytics, A/B testing, causal inference, Bayesian statistics

LANGUAGES

English (native); Swahili (conversational)
