Daniel Okafor-Reyes

Backend Engineer | Java, Kotlin, Python scripting

applicant.inbox@example.com | +44 7700 900123

PROFESSIONAL SUMMARY

Backend engineer with professional experience building and operating Java and Kotlin services, with a focus on REST APIs, PostgreSQL, Kafka, automated testing and reliable production systems. Experienced in on-call support, service extraction and event-processing reliability. Uses Python for scripts and small Jenkins helpers, and is building a Go CLI as a side project. Seeking a backend role working mainly in Python, bringing more than five years of professional Java/Kotlin backend experience and hands-on Python scripting experience.

TECHNICAL SKILLS

Languages: Java, Kotlin; Python (scripts and small Jenkins helpers); Go (learning; side project)
Backend and APIs: Spring Boot, REST API design, OpenAPI 3, microservices
Data and messaging: PostgreSQL, Oracle, Kafka, RabbitMQ, Redis
Cloud and containers: AWS (EKS, S3, SQS), Kubernetes, Docker
Testing: Testcontainers, Spring Cloud Contract, contract testing
Tooling: Jenkins helpers/scripts
Other: On-call incident response; Terraform (can read, has not written modules)

PROFESSIONAL EXPERIENCE

Backend Engineer | Tejo Insurance Tech *2022–Present*

- Build and support Java and Kotlin Spring Boot microservices using Kafka, PostgreSQL, Redis and Kubernetes on AWS EKS.
- Designed a versioned OpenAPI 3 REST API for broker quote requests; added per-partner rate limiting and contract tests using Spring Cloud Contract. The API serves 12 broker partners and around 400,000 quote requests per month.
- Resolved duplicate claim records caused by at-least-once Kafka delivery by implementing a transactional outbox pattern and idempotency keys for consumers. Duplicate claims fell from approximately 40 per week to zero over the following quarter.
- Built the company's first Kotlin service, an internal Spring Boot document service that renders policy PDFs from templates; wrote Kotlin coding guidelines for the team.
- Participate in an on-call rota one week per month. Handled a major Kafka lag incident in March 2024 and produced a write-up that was praised.
- Run the backend guild meeting every two weeks (since 2024).

Software Developer | Viajar Online *2019–2021*

- Worked on the booking and payments parts of a large Java application.
- Increased payments-module test coverage from 35% to 70% using Testcontainers, enabling safer refactoring.
- Extracted email and SMS notifications from the booking monolith into a separate Spring Boot service using RabbitMQ and Thymeleaf, with Docker and Oracle.

PROJECTS

OpenAPI Specification Diff CLI | *Personal side project*

- Building a Go command-line tool to compare OpenAPI specifications; approximately 600 lines of

code and available on GitHub. Side project, not production software.

CERTIFICATION

Oracle Certified Professional: Java SE 11 Developer | 2020

LANGUAGES

English: Worked in an English-speaking environment at Tejo Insurance Tech; used English as the working language.
