## PROFESSIONAL SUMMARY

Backend engineer with 7 years of professional experience building and operating Java and Kotlin services, with a strong focus on REST APIs, PostgreSQL, event-driven systems, performance, and production reliability. Experienced with Docker, Kubernetes on AWS EKS, automated testing, and CI/CD. Fluent in English and accustomed to working fully in English. Interested in moving toward a Python backend stack; experience with Python is currently limited to scripts and small Jenkins helpers.

## TECHNICAL SKILLS

**Languages:** Java (8–17), Kotlin (basic), Python (scripts and small Jenkins helpers), Go (learning; personal project)
**Backend:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, OpenAPI
**Databases and messaging:** PostgreSQL, Oracle, Redis, Kafka, RabbitMQ
**Cloud and delivery:** Docker, Kubernetes, Helm, AWS (EKS, S3, SQS), Jenkins, Git
**Testing and systems:** JUnit 5, Testcontainers, Spring Cloud Contract, Linux

## PROFESSIONAL EXPERIENCE

**Backend Engineer | Tejo Insurance Tech | Lisbon**
Jan 2022 – Present

- Develop and maintain seven Java 17 / Spring Boot microservices supporting policy quoting and claims intake.
- Designed a versioned OpenAPI 3 REST API for partner quoting; 12 broker partners onboarded, handling around 400,000 quote requests per month. Added partner-level rate limiting and contract tests with Spring Cloud Contract.
- Improved quote endpoint p99 latency from 1.8 seconds to 450 milliseconds by adding Redis caching and resolving JPA N+1 queries.
- Built Kafka event producers and consumers for claims workflows. Implemented a transactional outbox and idempotency keys, reducing duplicate claim records from around 40 per week to zero over the following quarter.
- Deploy services to Kubernetes on AWS EKS using Helm charts and Jenkins pipelines; participate in a one-week-per-month on-call rota.
- Investigated a significant Kafka lag incident in March 2024 and contributed a well-regarded incident write-up.
- Built a small internal Kotlin / Spring Boot service to render policy PDFs from templates using AWS S3 and SQS; wrote the team's Kotlin coding guidelines.
- Run the backend guild meeting every two weeks (since 2024).

**Software Developer | Viajar Online S.A. | Porto**
Sep 2019 – Dec 2021

- Built booking and payment features in a Java 11 / Spring MVC application backed by Oracle.
- Wrote integration tests using Testcontainers, increasing payments-module test coverage from 35% to 70% and supporting safer refactoring.
- Helped split the monolith by extracting the email and SMS notifications service into a separate Spring Boot application using RabbitMQ.

**Junior Developer (Internship, then Full-time) | CodeFarol Lda | Porto**
Jul 2018 – Aug 2019

- Maintained PHP and later Java applications for small-business clients.

## ADDITIONAL PROJECT

**OpenAPI Specification Diff CLI | Personal project**

- Building a Go command-line tool to compare OpenAPI specifications; approximately 600 lines of code, not used in production.

## EDUCATION

**BSc Informatics Engineering | Atlantic Polytechnic Institute | 2018**

## CERTIFICATION

**Oracle Certified Professional: Java SE 11 Developer | 2020**

## LANGUAGES

English (fluent; professional working environment at Tejo Insurance Tech) | Portuguese (fluent) | Spanish (conversational)
