PROFESSIONAL SUMMARY

Backend engineer with 7+ years of experience building Java and Spring services for insurance and travel products. Experienced in REST API design, PostgreSQL and Oracle, Kafka event processing, automated testing, and AWS cloud deployment. Improved API performance and production reliability, and participates in on-call incident response. Interested in moving to a Python stack; Python experience is currently limited to scripts and Jenkins helpers.

TECHNICAL SKILLS

Languages: Java 8–17, Kotlin (basic), Python (scripting), Go (learning; personal project)
Backend and APIs: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST, OpenAPI
Data and messaging: PostgreSQL, Oracle, Redis, Kafka, RabbitMQ
Cloud and delivery: AWS (EKS, S3, SQS), Docker, Kubernetes, Helm, Jenkins, Git, Linux
Testing: JUnit 5, Testcontainers, Spring Cloud Contract

PROFESSIONAL EXPERIENCE

Backend Engineer | Tejo Insurance Tech | Jan 2022–Present

- Develop and maintain seven Java 17 and Spring Boot microservices for policy quoting and claims intake.
- Designed a versioned REST API using OpenAPI 3 for 12 broker partners. Added partner-specific rate limiting and contract tests; the API handles around 400,000 quote requests per month.
- Reduced quote endpoint p99 latency from 1.8 seconds to 450 ms using Redis caching and by fixing N+1 JPA queries.
- Implemented a transactional outbox and idempotent Kafka consumers, reducing duplicate claims from approximately 40 per week to zero over the following quarter.
- Built a Kotlin and Spring Boot document service for policy PDFs using AWS S3 and SQS, and wrote the team's Kotlin coding guidelines.
- Deploy services to Kubernetes on AWS EKS using Helm and Jenkins pipelines. Participate in on-call one week per month; handled and documented a Kafka lag incident in March 2024.
- Facilitate the backend guild meeting every two weeks, and work in English across the team.

Software Developer | Viajar Online S.A. | Sep 2019–Dec 2021

- Built booking and payment features in a Java 11 and Spring MVC monolith backed by Oracle.
- Used Testcontainers for integration tests, increasing payments module coverage from 35% to 70% and supporting safer refactoring.
- Extracted email and SMS notifications into a separate Spring Boot service using RabbitMQ, Oracle and Docker.

Junior Developer, internship then full-time | CodeFarol Lda | Jul 2018–Aug 2019

- Maintained PHP and Java applications for small business clients.

EDUCATION

BSc Informatics Engineering | Atlantic Polytechnic Institute | 2018

CERTIFICATION

Oracle Certified Professional Java SE 11 Developer | 2020

PERSONAL PROJECT

OpenAPI specification diff CLI | Go

- Building a personal command-line project to compare OpenAPI specifications; approximately 600 lines, not used in production.
