Dear Aurelis Cloud Hiring Team,

I'm applying for the Site Reliability Engineer – Early Talent Programme. I am transitioning from QA automation into platform and Site Reliability Engineering; over the past two years, my work has focused largely on CI/CD pipelines, Kubernetes-based test environments and build tooling. I'm interested in bringing that experience into a reliability-focused role and continuing to develop my platform engineering skills.

At Odrava Health Software, I own GitLab CI pipelines for three product teams and built short-lived merge-request environments using Docker Compose and Helm on a shared Kubernetes cluster. I also improved pipeline performance from 38 to 14 minutes on average, while reducing monthly CI runner costs by about 30%. I also wrote an internal guide to the CI system that is used in team onboarding, reinforcing my focus on clear documentation and repeatable engineering practices. Maintaining a pytest and Playwright suite of around 900 tests has also taught me the importance of reliable feedback and clear documentation in day-to-day engineering work.

I use Python, Bash and Java for automation, and have hands-on experience with Git, Docker, Kubernetes, Helm and GitLab CI, including namespace-level Kubernetes work and Helm-based deployments on a shared cluster. Outside work, I built a three-node k3s cluster on Raspberry Pi 5 devices, deploying applications from Git with Argo CD, and configured Prometheus, Grafana and Loki for monitoring. I'm currently studying for the Certified Kubernetes Administrator exam, scheduled for January 2027.

Aurelis Cloud's focus on reliably operating large-scale infrastructure, paired with mentoring and real production work in the early-talent programme, appeals to me. I would value the opportunity to contribute my experience in automation, testing and infrastructure tooling while learning Linux systems, operational practices and the team's Kubernetes, Helm and Terraform standards under the guidance of experienced Site Reliability engineers. Thank you for considering my application.

Kind regards,

Marta Kowal-Brandt
