- Develop and maintain 7 Java 17 / Spring Boot microservices for policy quoting and claims intake.
- Designed and versioned the REST API for partner quoting integration used by 12 broker partners, using OpenAPI.
- Produce and consume Kafka events for the claims workflow; introduced idempotent consumers and an outbox table, eliminating duplicate claim records.
- Reduced quote endpoint p99 latency from 1.8 seconds to 450 milliseconds by adding Redis caching and fixing JPA N+1 queries.
- Deploy services to Kubernetes (EKS) using Helm charts and Jenkins pipelines; participate in the on-call rota one week per month.
