NADIA BRENNAN-AZIZ

Senior Platform and Cloud Infrastructure Engineer

nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior platform and cloud infrastructure engineer with 10 years of infrastructure experience, including six years running Kubernetes platforms on AWS. Experienced in designing, building and operating reliable cloud platforms, maintaining infrastructure as code, and leading technical work across platform and product teams. Focused on self-service infrastructure, clear operational practices and observability that helps teams run services confidently.

EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd | April 2022–Present

- Tech lead for a five-person platform team; operate an AWS EKS platform spanning eight clusters, approximately 350 services and three regions.
- Designed and built an internal developer platform with Go and Python service templates, Argo CD GitOps and Crossplane self-service for RDS, SQS and S3; adopted by all 14 product teams and reduced time from new service to production from approximately two weeks to under one day.
- Introduced SLOs, burn-rate alerts and error budget policies for the 20 most critical services; weekly on-call pages decreased by approximately 60%.
- Led migration from managed node groups to Karpenter and Spot instances for stateless workloads; reduced EC2 spend by 38% (approximately £410,000 per year).
- Participate in the incident commander rotation and established incident and post-mortem processes.

Site Reliability Engineer | Brightwater Games | January 2019–March 2022

- Operated AWS game backend infrastructure for titles with up to 1.2 million daily active players, using EC2, ECS and EKS.
- Managed AWS infrastructure in Terraform across approximately 40 modules and introduced Atlantis plan and apply workflows for pull requests.
- Replaced a noisy Nagios setup with Prometheus, Grafana, Alertmanager and Loki observability.
- Led launch capacity planning and used k6 load tests, including tests simulating 300,000 concurrent players; identified and resolved a connection pool limit before launch.

EDUCATION

BSc Computer Science | University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021, renewed 2024
AWS Certified Solutions Architect – Professional | 2023

TECHNICAL SKILLS

AWS: EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront
Infrastructure as code and platform: Terraform, Atlantis, Crossplane, Kubernetes, Helm, Kustomize, Argo CD, Karpenter
Observability and reliability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs and error budgets, incident management
Programming and automation: Go, Python, Bash, GitHub Actions, Puppet
Other: Linux, k6

ADDITIONAL CONTRIBUTIONS

- Speaker at a UK DevOps meetup in 2024: “SLOs that product managers care about”.
- Mentored three engineers moving from backend engineering into SRE.
- Built an open-source Kubernetes controller in Go to delete expired preview namespaces; approximately 120 GitHub stars.
