Daniel Okafor-Reyes

Backend Engineer | Java, Kotlin, Python (scripting)

PROFESSIONAL SUMMARY

Backend engineer with 7+ years of professional software development experience, building and operating services with Java and Kotlin. Experienced in REST API design, PostgreSQL, Kafka, automated testing, Docker, Kubernetes and AWS service environments. Has used Python for data-fix scripts and small Jenkins helpers, and is developing a Go CLI as a learning project. Interested in applying this backend experience in a role focused mainly on Python. Works in English and takes part in production on-call operations.

TECHNICAL SKILLS

Languages: Java, Kotlin; Python (scripts and small Jenkins helpers); Go (learning; side project)

Backend and APIs: Spring Boot, REST API design, OpenAPI 3, Spring Cloud Contract

Data and messaging: PostgreSQL, Oracle, Kafka, RabbitMQ, Redis, AWS S3, AWS SQS

Cloud and tools: Kubernetes (EKS), Docker, Jenkins

Testing and reliability: Testcontainers, contract testing, idempotent consumers, on-call incident response

PROFESSIONAL EXPERIENCE

Backend Engineer | Tejo Insurance Tech *2022–Present*

- Build and maintain Java and Kotlin Spring Boot microservices using Kafka and Kubernetes.
- Designed a versioned OpenAPI 3 REST API for insurance brokers; added partner-level rate limiting and Spring Cloud Contract tests. The API supports 12 broker partners and approximately 400,000 quote requests per month.
- Resolved duplicate claim records caused by at-least-once Kafka delivery by implementing a transactional outbox pattern and idempotency keys for consumers. Duplicate claims fell from approximately 40 per week to zero over the following quarter.
- Built the company's first Kotlin service, an internal policy-PDF rendering service using Spring Boot, AWS S3 and SQS, and wrote Kotlin coding guidelines for the team.
- Participate in a one-week-per-month on-call rota. Handled a major Kafka lag incident in March 2024 and wrote a post-incident account that was praised.
- Run the backend guild meeting every two weeks (since 2024).
- Work in English.

Software Developer | Viajar Online *2019–2021*

- Worked on booking and payments in a large Java application.
- Raised payments-module test coverage from 35% to 70% using Testcontainers, enabling safer refactoring.
- Extracted email and SMS notifications from the booking monolith into a separate Spring Boot service, using RabbitMQ for messaging and Thymeleaf for templating.

SELECTED PROJECT

OpenAPI Diff CLI | Personal learning project *In progress*

- Building a Go command-line tool to compare OpenAPI specifications; approximately 600 lines of code and not used in production.

CERTIFICATION

Oracle Certified Professional: Java SE 11 Developer *2020*
