NADIA BRENNAN-AZIZ

Senior Site Reliability / Platform Engineer

nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior site reliability and platform engineer with 10 years of infrastructure experience, including six years running Kubernetes platforms on AWS. Technical lead for a platform team, with hands-on experience designing, building and operating cloud infrastructure, internal developer platforms and infrastructure as code. Focused on reliable, observable platforms and self-service paths that help product teams deploy services safely and quickly.

CORE SKILLS

AWS (EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront); Kubernetes; Terraform; infrastructure as code; cloud infrastructure design and operation; Linux; Go; Python; Bash; Argo CD; Crossplane; Karpenter; Helm; Kustomize; Atlantis; Prometheus; Grafana; Loki; Alertmanager; OpenTelemetry; SLOs and error budgets; incident management; k6; GitHub Actions; Puppet.

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd (B2B accounting SaaS) | Apr 2022–Present

- Technical lead of a five-person platform team; run an AWS EKS platform spanning eight clusters, approximately 350 services and three regions.
- Designed and built an internal developer platform with Go and Python service templates, Argo CD GitOps and Crossplane self-service for RDS, SQS and S3. Adopted by all 14 product teams; reduced time from new service to production from approximately two weeks to under one day.
- Introduced SLOs, burn-rate alerts and error budgets for the 20 most critical services, agreeing the error budget policy with product leadership. Reduced on-call pages per week by approximately 60%.
- Replaced cluster-autoscaler managed node groups with Karpenter and spot instances for stateless workloads; reduced EC2 spend by 38% (approximately GBP 410k per year).
- Serve in the incident commander rotation and established the incident and post-mortem process.

Site Reliability Engineer | Brightwater Games | Jan 2019–Mar 2022

- Operated AWS game-backend infrastructure across EC2, ECS and EKS for titles with up to 1.2 million daily active players.
- Managed AWS infrastructure as code with approximately 40 Terraform modules and Atlantis plan/apply workflows on pull requests.
- Replaced a noisy Nagios setup with Prometheus, Grafana, Alertmanager and Loki.
- Used k6 load tests and launch-day capacity planning to prepare services for releases; a test simulating 300,000 concurrent players identified a connection-pool limit before launch.

Linux Systems Engineer | Pennine Hosting | Jul 2016–Dec 2018

- Managed approximately 600 Linux servers for hosting customers using Puppet configuration management.
- Automated operational tasks with Bash and Python and participated in on-call support for customer incidents.

ADDITIONAL EXPERIENCE AND CONTRIBUTIONS

- Built an open-source Kubernetes controller in Go to delete expired preview namespaces; approximately 120 GitHub stars.

- Delivered the talk “SLOs that product managers care about” at a UK DevOps meetup in 2024.
- Mentored three engineers moving from backend development into SRE.

EDUCATION

BSc Computer Science | University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021, renewed 2024
AWS Certified Solutions Architect – Professional | 2023

LANGUAGES

English (native); Urdu (conversational)
