Tobias Mwangi-Hartley

Data Scientist | Applied Machine Learning

tobias.mwangihartley@example.com | +44 7700 900110 | linkedin.com/in/tmh-example

PROFESSIONAL SUMMARY

Data scientist with 6 years in analytics and data science, including 4+ years as a data scientist, focused on experimentation, forecasting and customer analytics. Builds applied machine learning models and translates business questions into analyses teams can act on. Currently moving towards machine learning engineering.

CORE SKILLS

Programming and data: Python (pandas, scikit-learn), R (tidyverse, brms), SQL (BigQuery)
Machine learning and statistics: LightGBM, XGBoost, statsmodels, A/B testing, causal inference, time-series forecasting, Bayesian statistics
Data and analytics tools: dbt, Git, Jupyter, Looker

EXPERIENCE

Data Scientist | Thistlebox (meal-kit subscriptions) | Feb 2022–Present

- Design and analyse around 40 A/B tests annually for growth and product teams; built the team's sequential testing calculator.
- Built a weekly recipe-level demand forecasting model using LightGBM and calendar features, used by operations to order ingredients; reduced WAPE from 23% to 14%, with food waste down an estimated 9%.
- Built an XGBoost churn propensity model used to target retention offers; validated uplift with a holdout.
- Write production SQL in BigQuery and maintain dbt models for the analytics layer.
- Present results to leadership monthly.

Junior Data Analyst | Firth Energy Retail | Sep 2020–Jan 2022

- Conducted customer segmentation and tariff analysis using R and SQL.
- Automated monthly regulator reports with R Markdown.

EDUCATION

MSc Statistics | University of the Lothians | 2020 | Distinction
Dissertation: Bayesian hierarchical models for small-area energy demand
BSc Mathematics | University of the Lothians | 2019

LANGUAGES

English (native), Swahili (conversational)
