Professional Summary

Backend engineer building and running Java and Kotlin services for insurance and travel products. Experience in REST API design, PostgreSQL, query tuning, Kafka event processing, automated testing and AWS EKS deployments. Reduced quote API p99 latency from 1.8 s to 450 ms and eliminated duplicate claims through transactional outbox and idempotent consumers. Seeking to bring this production experience to a Python-focused backend role; current Python experience is scripting.

Technical Skills

Languages: Java 8-17, Kotlin, Python (data-fix scripts and Jenkins helpers)

Backend and APIs: Spring Boot, Spring MVC, REST, OpenAPI 3, Spring Data JPA, Hibernate

Data and messaging: PostgreSQL, Oracle, Redis, Kafka, RabbitMQ

Cloud and delivery: AWS (EKS, S3, SQS), Docker, Kubernetes, Helm, Jenkins CI/CD, Git, Linux

Testing: JUnit 5, Testcontainers, Spring Cloud Contract

Professional Experience

Backend Engineer | Tejo Insurance Tech | Jan 2022 - Present

- Develop and maintain seven Java 17 / Spring Boot microservices for policy quoting and claims intake.
- Designed a versioned REST API with OpenAPI 3 for 12 broker partners, handling approximately 400,000 quote requests per month; added per-partner rate limiting and contract tests with Spring Cloud Contract.
- Reduced quote endpoint p99 latency from 1.8 s to 450 ms through Redis caching and fixing N+1 queries in JPA.
- Implemented a transactional outbox and idempotency keys for Kafka consumers backed by PostgreSQL; duplicate claims fell from approximately 40 per week to zero over the following quarter.
- Built an internal Kotlin / Spring Boot service to render policy PDFs, using AWS S3 and SQS; wrote the team's Kotlin coding guidelines.
- Deploy services to Kubernetes on AWS EKS using Helm and Jenkins pipelines; participate in on-call one week per month.
- Handled a major Kafka lag incident in March 2024 and produced a praised incident write-up.
- Run fortnightly backend guild meetings since 2024; work entirely in English.

Software Developer | Viajar Online S.A. | Sep 2019 - Dec 2021

- Built booking and payment features in a Java 11 / Spring MVC monolith backed by Oracle.
- Wrote integration tests with Testcontainers, increasing payments module test coverage from 35% to 70% and supporting safer refactoring.
- Extracted email/SMS notifications into a separate Spring Boot service using RabbitMQ, Thymeleaf and Docker as part of the monolith decomposition.

Junior Developer (internship then full-time) | CodeFarol Lda | Jul 2018 - Aug 2019

- Maintained PHP and later Java applications for small business clients.

Education

BSc Informatics Engineering | Atlantic Polytechnic Institute | 2018

Certification

Oracle Certified Professional Java SE 11 Developer | 2020
