Aiyana Brooks-Tan

Professional Summary

Early-career web developer with professional React accessibility experience and project experience across TypeScript, Node.js, Express and PostgreSQL. Built screen-reader-tested interfaces, an API integrating public data sources and a freelance booking-request website. Strong focus on accessible user experiences, supported by automated testing and experience helping first-year web development students.

Technical Skills

Frontend: React, TypeScript, JavaScript, Next.js, Tailwind CSS, Chart.js

Backend and data: Node.js, Express, PostgreSQL, public API integration, Firebase Authentication

Testing and accessibility: Jest, React Testing Library, Storybook, NVDA, VoiceOver, Lighthouse, keyboard accessibility

Deployment: Vercel, static generation

Experience

Software Development Intern | Harbourline Media | May 2024 - August 2024

- Delivered accessibility fixes and components for a React news site.
- Built a keyboard- and screen-reader-friendly image gallery for article pages, documented in Storybook.
- Used Jest and React Testing Library for the gallery component.

Freelance Web Development | Yoga Studio Booking Site | 2025

- Built marketing pages and a class timetable with booking requests sent by email.
- Used Next.js static generation and Tailwind CSS; deployed on Vercel with content maintained in Markdown files.

Teaching Assistant | First-Year Web Development Lab | Spring 2025

- Helped approximately 30 students during one semester of web development labs.

Selected Projects

Tidewatch | Final Year Project | 2024 - 2025

- Built an accessible web app showing tides, water temperature and weather for sea swimmers around the Irish coast.
- Developed a React and TypeScript frontend, a Node.js/Express API caching data from public weather and tide APIs, and PostgreSQL storage for user favourites.
- Tested with NVDA and VoiceOver; achieved a Lighthouse accessibility score of 100.
- Used Chart.js and Jest. Received 82% (First Class) for the project and demonstrated it at the college project showcase.

Study Buddy | Group Project | 2023

- Built the React frontend and login screens for a study-matching app in a team of four; other team members built the API and database.
- Used JavaScript and Firebase Authentication.

Transit Delay Notifier | Student Hackathon | 2024

- Developed the frontend in a team of three, building the application in 24 hours and placing second.

Education

Computing | Liffey Institute of Technology

Final year project: Tidewatch, 2024 - 2025; project grade: 82% (First Class).

Volunteering

Manage social media for a sea swimming club.
