PROFESSIONAL SUMMARY

Full-stack developer building web applications professionally since 2014, with React, TypeScript, Node.js, NestJS and PostgreSQL experience in fintech onboarding. Delivered measurable improvements in conversion and mobile performance, implemented WCAG 2.1 AA accessibility audit fixes, and integrated identity verification and secure document uploads. Combines end-to-end development with designer collaboration, production support and mentoring experience.

PROFESSIONAL EXPERIENCE

Fullstack Developer | Älvgrind Fintech AB | 2021–Present

- Build customer-facing KYC onboarding features in a six-person team using React, TypeScript, Node.js, NestJS and PostgreSQL; collaborate with designers in Figma.
- Built a BankID identity verification flow, integrating the API through a provider SDK and handling QR codes, error states and retries. Onboarding conversion increased from 61% to 74%; the new flow was A/B tested with 10% of traffic before full rollout.
- Reduced mobile Largest Contentful Paint (LCP) from 4.1 seconds to 1.9 seconds through code splitting, image optimisation and removal or replacement of heavy dependencies.
- Implemented WCAG 2.1 AA accessibility audit fixes in the onboarding flow and migrated the frontend from Create React App to Vite in 2023.
- Built document uploads using S3 presigned URLs, ClamAV scanning in AWS Lambda, and status handling through SQS and PostgreSQL.
- Helped migrate legacy Express services to NestJS; jointly maintain a GraphQL backend-for-frontend. Use Next.js server-side rendering for marketing landing pages.
- Work with AWS ECS Fargate, Docker, GitHub Actions, Jest, Playwright, Storybook and Unleash feature flags; participate in an on-call rotation of one week every six weeks.

Developer | Sjöbris Digital Agency AB | 2018–2021

- Built websites and web applications for approximately 25 clients across retail, transport, municipalities and sport, using React, Angular, Node.js/Express and PHP/Laravel.
- Served as project technical lead and one of two developers on a React Native ferry ticket-purchasing app with approximately 50,000 downloads.
- Established GitLab CI for the agency, replacing FTP-based deployment workflows.
- Developed custom WordPress themes and plugins; worked with MySQL, MongoDB and Firebase across client projects.

Web Developer | Nordkust Media AB | 2014–2018

- Developed newspaper websites and an AngularJS article editor using PHP, jQuery and MySQL.
- Implemented a paywall integration, configured Varnish caching and performed Ubuntu server administration.

Freelance Web Developer / Student | 2012–2014

- Built websites for personal contacts and local businesses using PHP, jQuery and WordPress.

EDUCATION

Bachelor in Computer Science | West Coast University College (Högskola) | 2011–2014

Graduated 2014.

Additional training: Advanced React Patterns, 2022.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, SCSS, Next.js, Storybook, React Query, Redux, React Native, Angular.

Backend and databases: Node.js, NestJS, Express, REST, GraphQL, PostgreSQL, MySQL, Redis, Prisma, PHP, Laravel.

Automated testing: Jest, React Testing Library, Supertest, Playwright, Cypress.

Cloud and delivery: AWS ECS, S3, Lambda, SQS, CloudWatch, RDS; Docker, GitHub Actions, GitLab CI, Git, Linux.

Collaboration and operations: Figma, Agile/Scrum, Jira, Confluence, Sentry, Datadog, Unleash.

MENTORING AND COMMUNITY

- Evening mentor at a coding bootcamp, 2019–2020.
- Speaker at a local JavaScript meetup, 2022: “Migrating Express to NestJS without stopping the world”.

LANGUAGES

Swedish: native. English: fluent; working language at Älvgrind. Arabic: spoken at home.
