NADIA BRENNAN-AZIZ

Senior Site Reliability / Platform Engineer

nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior infrastructure engineer with 10 years of experience, including six running Kubernetes platforms on AWS. Technical lead with hands-on experience in cloud infrastructure design and operation, Terraform, developer self-service, observability and incident management. Delivered platforms adopted by 14 product teams, reduced service deployment lead time from approximately two weeks to under one day, and cut EC2 costs by 38%.

TECHNICAL SKILLS

Cloud and infrastructure: AWS, EKS, EC2, ECS, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront, Linux

Infrastructure as code and delivery: Terraform, Atlantis, Crossplane, Argo CD, Helm, Kustomize, GitHub Actions, Puppet

Reliability and observability: Prometheus, Grafana, Alertmanager, Loki, OpenTelemetry, Sloth, PagerDuty, SLOs, error budgets, incident management, k6

Engineering: Go, Python, Bash, Kubernetes controllers, system design, capacity planning

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd

Apr 2022 - present

- Technical lead of a five-person platform team, operating an AWS EKS platform spanning eight clusters, approximately 350 services and three regions.
- Built an internal developer platform with Go and Python service templates, Argo CD ApplicationSets and Crossplane compositions for self-service RDS, SQS and S3 provisioning through pull requests.
- Enabled all 14 product teams to use the platform; reduced time from new service to production from approximately two weeks to under one day.
- Introduced SLOs and burn-rate alerts for the 20 most critical services using Prometheus and Sloth; agreed an error budget policy with product leadership and reduced weekly on-call pages by approximately 60%.
- Replaced cluster-autoscaler node groups with Karpenter and Spot instances for stateless workloads, including interruption handling; reduced EC2 spend by 38%, approximately GBP 410,000 annually.
- Served in the incident commander rotation and wrote the incident and post-mortem process.

Site Reliability Engineer | Brightwater Games

Jan 2019 - Mar 2022

- Operated AWS game backend infrastructure across EC2, ECS and EKS for titles with up to 1.2 million daily active players.
- Managed all AWS infrastructure through Terraform, with approximately 40 modules and Atlantis plan/apply workflows on pull requests.
- Replaced Nagios with a Prometheus, Grafana, Alertmanager and Loki observability stack.
- Led capacity planning for two major launches; used k6 to simulate 300,000 concurrent players and identified and fixed a connection pool limit before launch.

Linux Systems Engineer | Pennine Hosting

Jul 2016 - Dec 2018

- Managed approximately 600 Linux servers for hosting customers using Puppet configuration

management.
- Automated operations with Bash and Python and provided on-call support for customer incidents.

OPEN SOURCE AND TECHNICAL LEADERSHIP

- Built an open-source Kubernetes controller in Go using controller-runtime to delete expired preview namespaces; approximately 120 GitHub stars.
- Mentored three backend engineers into SRE roles.
- Presented “SLOs that product managers care about” at a UK DevOps meetup in 2024.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) - 2021, renewed 2024
AWS Certified Solutions Architect - Professional - 2023

EDUCATION

BSc Computer Science | University of the North Moors | 2016
