Dear Tessel Cargo Software Hiring Team,

I'm applying for the Backend Engineer role on the Routing & Tracking team. I bring seven years of professional backend experience, primarily building and operating Java services, with a strong focus on reliable APIs, event-driven workflows, and production performance. Tessel's focus on dependable tracking systems and engineers who own what they build and operate is a strong match for the work I do.

At Tejo Insurance Tech, I develop and maintain seven Java 17 / Spring Boot microservices for policy quoting and claims intake. I designed and versioned a REST API used by 12 broker partners, and improved a quote endpoint's p99 latency from 1.8 seconds to 450 milliseconds by adding Redis caching and resolving JPA N+1 queries. I also work with Kafka event flows, where introducing idempotent consumers and an outbox table eliminated duplicate claim records. These experiences are relevant to improving the performance and reliability of Tessel's tracking API and working with event-driven Kafka workflows.

I also bring experience deploying Dockerised services to AWS EKS with Kubernetes, Helm and Jenkins CI/CD pipelines, participating in an on-call rota, and writing automated integration tests with Testcontainers. I also bring relational database experience, including PostgreSQL, and improved query performance by resolving JPA N+1 queries. At Viajar Online, those tests helped raise payments-module coverage from 35% to 70%. My professional backend experience is in Java rather than Python; Java is one of the comparable languages specified in the role, and my background includes the APIs, databases, testing and production operations central to the position.

I'm interested in contributing this experience to a team building shipment-tracking services at scale and aligned with Tessel's values of being dependable, saying what you see, and leaving systems better. I would welcome the opportunity to discuss how my background could support Tessel's Routing & Tracking platform.

Sincerely,

Daniel Okafor-Reyes
