MARTA KOWAL-BRANDT

DevOps / Platform Engineering | QA Automation Engineer
Wroclaw, Poland | marta.kowalbrandt@example.com | +48 555 303 303 | gitlab.com/mkb-example

PROFESSIONAL SUMMARY

QA automation engineer with 7 years of experience, including a recent focus on CI/CD pipelines, test environments and build tooling. Builds GitLab CI workflows and Helm-based ephemeral environments for three product teams, with measurable improvements in pipeline duration and test stability. Developing toward a full-time DevOps / platform engineering role, with additional hands-on personal experience using Terraform, k3s and GitOps.

TECHNICAL SKILLS

Infrastructure and CI/CD: GitLab CI, Jenkins, Docker, Docker Compose, Helm, Terraform (personal project)
Platforms and observability: Kubernetes (namespace-level access; Helm deployments to a shared cluster), k3s, Argo CD, Prometheus, Grafana, Loki
Programming and data: Python, Bash, Java (test code), SQL, PostgreSQL
Testing and tools: pytest, Playwright, Selenium, Postman, Linux, Git, Ansible (basic)
Cloud learning: AWS EC2 and S3 basics (personal learning)

EXPERIENCE

DevOps Engineer | Odrava Health Software, Wroclaw *2021–Present*

- Own GitLab CI pipelines for three product teams (approximately 25 developers), covering build, unit, integration and end-to-end test stages, plus artifact publishing.
- Reduced average pipeline duration from 38 to 14 minutes by parallelising test jobs, caching dependencies and separating end-to-end tests into their own stage; monthly CI runner cost fell by about 30%.
- Built short-lived, per-merge-request test environments with Docker Compose and later Helm on the company's shared Kubernetes cluster; environments include the application, PostgreSQL and seeded data, and are automatically removed after merge or 48 hours of inactivity.
- Maintain a pytest and Playwright end-to-end suite of approximately 900 tests; reduced the flaky-test rate from 7% to below 1%.
- Built a Python and PostgreSQL test-results pipeline and Grafana dashboards to help teams identify flaky tests.
- Wrote Bash and Python tooling for PostgreSQL test-data seeding and authored the internal CI guide used in onboarding.

QA Engineer | Brightmill Software House, Wroclaw *2019–2021*

- Tested web and mobile applications for client projects using manual and automated approaches.
- Introduced a Java and Selenium automated regression suite for the largest client project.
- Configured Jenkins jobs to run nightly regression tests.

Customer Support Specialist (2nd line) | Brightmill Software House *2018–2019*

- Investigated customer issues using logs and databases, and reproduced bugs for developers.

SELECTED PROJECT

Homelab k3s Cluster with GitOps | Personal project *2024–2025*

- Ran a three-node Raspberry Pi 5 k3s cluster, deploying applications from a Git repository with Argo CD.

- Set up Prometheus, Grafana and Loki for monitoring, with Traefik ingress and cert-manager for TLS.
- Provisioned infrastructure for a small Hetzner VPS with Terraform; used Ansible at a basic level.

EDUCATION

BEng, Computer Engineering | Silesian Lowlands University of Technology | 2018

CERTIFICATION AND PROFESSIONAL DEVELOPMENT

ISTQB Foundation Level | 2019
Preparing for the Certified Kubernetes Administrator (CKA) exam, scheduled for January 2027

LANGUAGES

Polish (native), English (C1), German (A2)
