Daniel Okafor-Reyes

Backend Engineer | Java and Kotlin | Kafka, PostgreSQL, REST APIs

applicant.inbox@example.com | +44 7700 900123

PROFESSIONAL SUMMARY

Backend engineer with professional experience building Java and Kotlin services since 2019, including Spring Boot microservices, REST APIs, PostgreSQL, Kafka event processing, automated testing and production on-call. Interested in moving into a Python-focused backend role, bringing experience in comparable backend languages. Python experience to date is scripting rather than production services.

TECHNICAL SKILLS

Backend: Java, Kotlin, Spring Boot, REST API design, OpenAPI 3
Data: PostgreSQL, Redis, Oracle
Messaging: Kafka, RabbitMQ
Testing: Testcontainers, Spring Cloud Contract
Containers and cloud: Docker, Kubernetes (EKS), AWS S3, AWS SQS
Additional: Python scripts for data fixes and small Jenkins helpers; Go learning project (OpenAPI-diff CLI)
Production: On-call incident response, service reliability

PROFESSIONAL EXPERIENCE

Backend Engineer | Tejo Insurance Tech | 2022–Present

- Designed a versioned OpenAPI 3 REST API for insurance brokers; added partner rate limiting and Spring Cloud Contract tests. Onboarded 12 broker partners, handling around 400,000 quote requests per month.
- Resolved duplicate claim records caused by at-least-once Kafka delivery by implementing a transactional outbox and consumer idempotency keys; duplicate claims fell from around 40 per week to zero over the following quarter.
- Built a Kotlin and Spring Boot internal service to render policy PDFs from templates, using AWS S3 and SQS; wrote the company's first Kotlin service guidelines.
- Participate in an on-call rota, one week per month. Handled a major Kafka lag incident in March 2024; the incident write-up was praised.
- Run the backend guild meeting every two weeks, since 2024.

Software Developer | Viajar Online | 2019–2021

- Worked on booking and payments in a large Java application.
- Raised payments-module test coverage from 35% to 70% using Testcontainers, enabling safer refactoring.
- Extracted email and SMS notifications from the booking monolith into a Spring Boot service, using RabbitMQ and Thymeleaf.

SIDE PROJECT

OpenAPI-diff CLI | Go

- Building a roughly 600-line command-line tool to compare OpenAPI specifications as a learning project; available on GitHub and not used in production.

CERTIFICATION

Oracle Certified Professional: Java SE 11 Developer | 2020

LANGUAGES

English: Used as the working language at Tejo Insurance Tech.
