NADIA BRENNAN-AZIZ

Senior Platform / Site Reliability Engineer

Manchester, UK | nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior platform and site reliability engineer with 10 years of infrastructure experience, including six years operating Kubernetes platforms on AWS. Hands-on experience designing, building and operating AWS cloud infrastructure and production platforms with Terraform, including leading platform initiatives from delivery through operation. Builds reliable, observable platforms and self-service tools that help product teams deploy and operate services effectively. Experienced in technical leadership, incident management, SLOs and cross-functional work with product leadership.

CORE SKILLS

Cloud infrastructure: AWS (EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront), cloud environment design and operation

Infrastructure as code: Terraform, Atlantis, Crossplane

Platforms and orchestration: Kubernetes, Helm, Kustomize, Argo CD, Karpenter

Reliability and observability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs and error budgets, incident management

Programming and automation: Go, Python, Bash, GitHub Actions

Systems: Linux, Puppet, k6

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd

Manchester / remote | Apr 2022 – Present

- Tech lead for a five-person platform team, operating an AWS EKS platform across eight clusters and three regions.
- Led development of an internal developer platform, including Go and Python service templates, Argo CD GitOps, and Crossplane self-service provisioning for RDS, SQS and S3.
- Reduced the time to take a new service to production from approximately two weeks to under one day.
- Moved node provisioning to Karpenter, using Spot instances for stateless workloads with interruption handling; reduced EC2 spend by 38% (approximately GBP 410,000 per year).
- Introduced SLOs, burn-rate alerts and error budgets for the 20 most critical services, aligning the error-budget policy with product leadership. Reduced on-call pages by approximately 60%.
- Participate in the incident commander rotation and established the incident and post-mortem process.

Site Reliability Engineer | Brightwater Games

Leeds | Jan 2019 – Mar 2022

- Operated AWS game-backend infrastructure using EC2, ECS and later EKS.
- Managed AWS infrastructure as code using approximately 40 Terraform modules, with Atlantis for plan and apply workflows on pull requests.
- Replaced a noisy Nagios setup with a Prometheus, Grafana, Alertmanager and Loki observability stack.
- Used k6 load testing and launch-day capacity planning to prepare services for major launches. A test simulating 300,000 concurrent players identified a connection-pool limit that was fixed before launch.
- Used k6 to simulate 300,000 concurrent players and identified a connection-pool limit that was fixed before launch.

SELECTED PROJECT

Kubernetes preview-namespace cleanup operator | Open source | 2024

- Built a small Go Kubernetes controller with controller-runtime to delete expired preview namespaces; the project has approximately 120 GitHub stars.

LEADERSHIP & SPEAKING

- Mentored three engineers transitioning from backend engineering into SRE.
- Speaker at a UK DevOps meetup in 2024: “SLOs that product managers care about”.

EDUCATION

BSc Computer Science | University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021; renewed 2024
AWS Certified Solutions Architect – Professional | 2023

LANGUAGES

English (native) | Urdu (conversational)
