NADIA BRENNAN-AZIZ

Senior Platform Engineer | Cloud Infrastructure / SRE

Manchester, UK | nadia.brennanaziz@example.com | +44 7700 900909 | github.com/nba-sre-example

PROFESSIONAL SUMMARY

Senior platform and SRE engineer with 10 years of infrastructure experience, including six years running Kubernetes platforms on AWS. Builds dependable cloud infrastructure and paved roads for product teams through self-service platforms, infrastructure as code, observability, and practical incident processes. Technical lead with a record of improving deployment speed, service reliability, and infrastructure cost.

EXPERIENCE

Senior Platform Engineer - Tallybrook Ltd (B2B accounting SaaS), Manchester / remote Apr 2022 - Present

- Technical lead of the five-person platform team, operating an EKS platform with 8 clusters, approximately 350 services, and 3 regions.
- Built an internal developer platform adopted by all 14 product teams: Go and Python service templates, Argo CD ApplicationSets, and Crossplane compositions for self-service RDS, SQS, and S3.
- Reduced time from new service to production from approximately 2 weeks to under 1 day.
- Led migration from cluster-autoscaler managed node groups to Karpenter, using Spot instances for stateless workloads; reduced EC2 spend by 38% (about GBP 410k per year).
- Introduced SLOs, burn-rate alerts, and error budget policies for the 20 most critical services in partnership with product leadership; reduced on-call pages per week by approximately 60%.
- Participate in the incident commander rotation and wrote the incident and post-mortem process.

Site Reliability Engineer - Brightwater Games, Leeds Jan 2019 - Mar 2022

- Operated AWS game backend infrastructure for titles with up to 1.2 million daily active players, across EC2, ECS, and EKS.
- Managed AWS infrastructure in Terraform using approximately 40 modules, with Atlantis for pull-request plan and apply workflows.
- Replaced a noisy Nagios setup with Prometheus, Grafana, Alertmanager, and Loki.
- Load-tested with k6 and planned launch capacity; a test simulating 300,000 concurrent players exposed a connection-pool limit that was fixed before launch.

EDUCATION

BSc Computer Science, University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021, renewed 2024
AWS Certified Solutions Architect - Professional | 2023

SKILLS

Cloud infrastructure: AWS, EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront
Infrastructure as code and configuration: Terraform, Atlantis, Puppet
Kubernetes and platform engineering: Kubernetes, Helm, Kustomize, Argo CD, Crossplane, Karpenter
Observability and reliability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, SLOs, error budgets, incident management
Programming and testing: Go, Python, Bash, k6
CI/CD: GitHub Actions

ADDITIONAL

Speaker, UK DevOps meetup (2024): “SLOs that product managers care about”
Mentored three engineers transitioning from backend development into SRE
Languages: English (native), Urdu (conversational)
