Daniel Okafor-Reyes

Backend Software Engineer | Java / Kotlin

Lisbon, Portugal | daniel.okafor-reyes@example.com | +351 555 010 202 | linkedin.com/in/daniel-okafor-reyes-example

PROFESSIONAL SUMMARY

Backend engineer with 7 years of professional experience building and operating services in Java and Kotlin, with production experience in Spring Boot, PostgreSQL, REST APIs, Kafka, Docker and AWS-based deployments. Skilled in query tuning, automated testing, CI/CD and production incident response. Python experience is limited to scripts and small Jenkins helpers; interested in moving into a backend role working primarily in Python.

TECHNICAL SKILLS

Backend: Java (8–17), Kotlin (basic), Spring Boot, Spring MVC, Spring Data JPA, Hibernate; Python scripting (data fixes and small Jenkins helpers)
APIs and messaging: REST, OpenAPI, Kafka, RabbitMQ
Data: PostgreSQL, Oracle, Redis
Cloud and delivery: Docker, Kubernetes, Helm, AWS (EKS, S3, SQS), Jenkins, Git, Linux
Testing: JUnit 5, Testcontainers, Spring Cloud Contract

PROFESSIONAL EXPERIENCE

Backend Engineer | Tejo Insurance Tech, Lisbon *Jan 2022–Present*

- Develop and maintain 7 Java 17 / Spring Boot microservices for policy quoting and claims intake.
- Designed a versioned OpenAPI 3 REST API for broker quoting, including partner rate limiting and contract tests; the API serves 12 partners and around 400,000 quote requests per month.
- Improved quote endpoint p99 latency from 1.8 seconds to 450 milliseconds by adding Redis caching and fixing JPA N+1 queries.
- Resolved duplicate claims from at-least-once Kafka delivery by implementing a transactional outbox and idempotent consumers; duplicate records fell from around 40 per week to zero over the following quarter.
- Deploy services using Helm to Kubernetes on EKS through Jenkins pipelines; use AWS S3 and SQS for service integrations. Participate in a one-week-per-month on-call rotation.
- Handled a significant Kafka lag incident in March 2024; the incident write-up was praised. Run the backend guild meeting every two weeks (since 2024).
- Built an internal Kotlin / Spring Boot service to render policy PDFs from templates and wrote the team's Kotlin coding guidelines.

Software Developer | Viajar Online S.A., Porto *Sep 2019–Dec 2021*

- Built booking and payment features in a Java 11 / Spring MVC monolith backed by Oracle.
- Added integration tests with Testcontainers, raising payments-module test coverage from 35% to 70% and supporting safer refactoring.
- Extracted email and SMS notifications from the monolith into a Spring Boot service using RabbitMQ and Thymeleaf.

Junior Developer (Internship, then full-time) | CodeFarol Lda, Porto *Jul 2018–Aug 2019*

- Maintained PHP and later Java applications for small business clients.

EDUCATION

BSc Informatics Engineering | Atlantic Polytechnic Institute, 2018

CERTIFICATION

Oracle Certified Professional: Java SE 11 Developer, 2020
