AIYANA BROOKS-TAN

PROFESSIONAL SUMMARY

Third-year Computing student and early-career web developer with a four-month software development internship and hands-on academic, freelance, and hackathon experience building React and TypeScript interfaces. Project experience spans TypeScript, Node.js/Express APIs, PostgreSQL, and automated testing. Developed an accessibility-focused final-year project tested with screen readers and achieved a Lighthouse accessibility score of 100.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Tailwind CSS
Backend and data: Node.js, Express, PostgreSQL, Firebase Authentication
Testing: Jest, React Testing Library
Accessibility: screen-reader testing (NVDA, VoiceOver), Lighthouse, Storybook
Other: Chart.js, Vercel

EXPERIENCE

Software Development Intern | Harbourline Media *May 2024 – Aug 2024*

- Contributed to accessibility fixes and React components for a news website during a four-month software development internship.
- Built a keyboard- and screen-reader-friendly image gallery for article pages.
- Documented the gallery component in Storybook and used Jest and React Testing Library.

Teaching Assistant, First-Year Web Development Lab *Spring 2025 | One semester*

- Supported approximately 30 students during one semester of first-year web development lab sessions.

PROJECTS

Tidewatch | Final-Year Project *2024–2025*

- Built an accessible web app for sea swimmers showing tides, water temperature, and weather around the Irish coast.
- Built the React/TypeScript frontend and a Node.js/Express backend API that cached data from public weather and tide APIs; used PostgreSQL for user favourites.
- Used PostgreSQL to store user favourites and Chart.js to present data.
- Used Jest for automated testing and tested the interface with NVDA and VoiceOver screen readers; achieved a Lighthouse accessibility score of 100.
- Awarded 82% (First Class); demonstrated at the college project showcase.

Yoga Studio Booking Site | Freelance wellness project *2025*

- Built marketing pages and a class timetable with booking requests sent by email.
- Used Next.js static generation and Tailwind CSS; deployed on Vercel.
- Set up content editing through Markdown files.

Transit Delay Notifier | Student Hackathon *2024*

- Collaborated in a three-person team to build a transit delay notifier in 24 hours; placed second.

- Developed the frontend.

Study Buddy | Group Project *2023*

- Built the React frontend and login screens for a four-person student project: a web app matching classmates for study sessions.
- Used JavaScript and Firebase Authentication; other team members developed the API and database.

VOLUNTEERING

Social Media Volunteer | Sea Swimming Club

- Run social media for a sea swimming club.

EDUCATION

Computing | Liffey Institute of Technology

Third-year student
