# RAFAEL MORETTI-KLEIN

Backend Engineer (Python) | Principal Software Engineer

Munich, Germany | rafael.morettiklein@example.com | +49 555 0505 505 | linkedin.com/in/rmk-example

## PROFESSIONAL SUMMARY

Backend engineer and engineering leader with 21 years of experience building large-scale services in Python, Go and C++. Experienced in platform architecture, API and distributed-systems development, event ingestion, and service reliability. Led organisations of up to 45 engineers and defined architecture for platforms serving more than 50 million users, while continuing to write code regularly, most recently for internal tooling.

## PROFESSIONAL EXPERIENCE

**Director of Engineering, Platform | Streamhaus GmbH (video streaming), Munich**
*2019 – August 2026*

- Led a platform organisation of five teams, 45 engineers and five engineering managers, responsible for identity, playback API, billing integration and developer platform.
- Drove migration from a Python 2 monolith to approximately 60 Python and Go services on GKE; improved playback API availability from 99.5% to 99.95%.
- Reduced cloud spend by 31% (EUR 4.2M per year) through rightsizing, committed-use discounts and an internal cost dashboard.
- Introduced an RFC process, architecture review board and on-call guidelines adopted company-wide.
- Grew the organisation from 18 to 45 engineers and conducted more than 200 interviews.

**Principal Engineer | Streamhaus GmbH**
*2015 – 2019*

- Served as technical lead for the playback API, using Python, Tornado, an internal framework similar to FastAPI, Cassandra and Redis.
- Designed an entitlement service handling 120,000 requests per second at peak, using Go and Cassandra.
- Co-authored the company's service template and Python style guide.

**Senior Software Engineer | Nordfels Telematik AG, Stuttgart**
*2010 – 2015*

- Built backend systems for fleet telematics, ingesting GPS data from 300,000 vehicles using C++, Python, PostgreSQL/PostGIS and RabbitMQ.
- Led a team of six developers on the route-history product.

**Software Engineer | Dataquelle Systems GmbH, Karlsruhe**
*2005 – 2010*

- Developed C++ and Python software for industrial data acquisition on Linux and embedded x86.
- Built a Python test harness used by QA for eight years.

## TECHNICAL SKILLS

**Languages:** Python (Django, Flask, FastAPI, Tornado, asyncio), Go, C++ (older)
**Databases and messaging:** PostgreSQL/PostGIS, Cassandra, Redis, Kafka, RabbitMQ
**Cloud and infrastructure:** GCP (GKE, Pub/Sub, BigQuery), AWS (EC2, S3), Kubernetes, Terraform
**Monitoring and protocols:** Prometheus, Grafana, OpenTelemetry, gRPC, Protobuf
**Other:** Distributed systems design, architecture reviews, technical hiring, people management

## EDUCATION

Dipl.-Inf. (equivalent MSc), Computer Science | Rhine Valley University, 2005

## LANGUAGES

German (native), Italian (native), English (fluent)

## PUBLICATIONS & TALKS

- “Running Python at 100k rps” – EuroPython-style conference talk, 2018
- “Cost is a feature” – internal platform engineering summit keynote, 2023
