Dear Quillstone Payments Hiring Team,

I am applying for the Machine Learning Engineer – Customer Support AI role. I bring more than five years of experience in NLP and document classification, with hands-on work taking machine-learning models from research and prototyping into production. The opportunity to build and operate practical AI systems for merchant support—working from prototype through production—particularly interests me.

In my current role at Slavonica Document AI, I developed an automated document-classification model that achieved 94% accuracy across 23 classes for public-sector clients. I hold an MSc in Computer Science from Drava University and am currently pursuing PhD studies in Computer Science. I have also fine-tuned BERTić and XLM-R for named entity recognition in Croatian documents, and deployed models as FastAPI services in Docker on Azure ML and Azure App Service. Using Python, I have applied MLOps practices with MLflow for experiment tracking, model versioning and registry, and production monitoring. To support reliable operations, I introduced MLflow for experiment tracking and model registry and established production monitoring for data drift with weekly reporting. This experience aligns closely with your need to build, serve and monitor AI systems in production.

My earlier work includes building text-classification models for customer complaints using TF-IDF, logistic regression and fastText, as well as developing churn-prediction models with gradient boosting and LightGBM. Alongside my production experience, my PhD research on named entity recognition in Croatian legal texts has strengthened my ability to prepare and work with text data. I would welcome the opportunity to apply this combination of Python-based NLP, text classification, cloud deployment and production monitoring to AI systems that help support teams process and route merchant questions efficiently.

Thank you for considering my application. I would be glad to discuss how my experience could contribute to Quillstone Payments.

Sincerely,
Petra Zlatarić-Novosel
