NADIA BRENNAN-AZIZ

Senior Cloud Infrastructure / Platform Engineer
Manchester, United Kingdom | nadia.brennanaziz@example.com | +44 7700 900909

PROFESSIONAL SUMMARY

Senior platform and site reliability engineer with 10 years of infrastructure experience, including six years operating Kubernetes platforms on AWS and delivering a 38% reduction in EC2 spend. Hands-on technical lead experienced in designing and operating AWS infrastructure, managing Terraform-based infrastructure as code, and building platforms that help product teams deploy and operate services while improving delivery speed and reliability through self-service tooling, observability and clear operational processes.

LANGUAGES

English (native); Urdu (conversational)

EXPERIENCE

Senior Platform Engineer | Tallybrook Ltd | Manchester / remote | Apr 2022 - Present

- Tech lead of the five-person platform team; operate an AWS EKS platform spanning eight clusters, approximately 350 services and three regions. Participate in the incident commander rotation and wrote the incident and post-mortem process.
- Designed and built an internal developer platform with Go and Python service templates, Argo CD GitOps and Crossplane self-service for RDS, SQS and S3; adopted by all 14 product teams and reduced time from new service to production from approximately two weeks to under one day.
- Introduced SLOs, burn-rate alerts and an error-budget policy for the 20 most critical services, agreed with product leadership; reduced on-call pages per week by approximately 60%.
- Migrated node provisioning to Karpenter and introduced Spot instances for stateless workloads with interruption handling; reduced EC2 spend by 38%, approximately GBP 410,000 per year.

Site Reliability Engineer | Brightwater Games | Leeds | Jan 2019 - Mar 2022

- Operated AWS game backend infrastructure using EC2, ECS and EKS for titles with up to 1.2 million daily active players.
- Managed AWS infrastructure as code in Terraform across approximately 40 modules, using Atlantis for plan and apply on pull requests.
- Replaced a noisy Nagios setup with Prometheus, Grafana, Alertmanager and Loki.
- Ran k6 load tests and launch capacity planning, including tests simulating 300,000 concurrent players; identified and fixed a connection-pool limit before launch.

SELECTED PROJECT

Open-source Kubernetes cleanup controller | 2024

- Built a small Go controller using controller-runtime to delete expired preview namespaces; the project has approximately 120 GitHub stars.

LEADERSHIP AND COMMUNITY

- Mentored three backend engineers transitioning into SRE.
- Speaker at a UK DevOps meetup in 2024: “SLOs that product managers care about”.

EDUCATION & TRAINING

BSc Computer Science | University of the North Moors | 2016

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | 2021, renewed 2024
AWS Certified Solutions Architect - Professional | 2023

TECHNICAL TOOLKIT

AWS (EKS, EC2, VPC, IAM, RDS, S3, SQS, Route 53, CloudFront); Kubernetes; Terraform; Atlantis; Helm; Kustomize; Argo CD; Crossplane; Karpenter; Go; Python; Bash; Prometheus; Grafana; Loki; Alertmanager; OpenTelemetry; k6; GitHub Actions; Puppet; Linux; SLOs and error budgets; incident management; Backstage (catalog).
