MARTA KOWAL-BRANDT

QA Automation Engineer | DevOps & Platform Engineering

Wroclaw, Poland | marta.kowalbrandt@example.com | +48 555 303 303 | gitlab.com/mkb-example

PROFESSIONAL SUMMARY

QA automation engineer with 7 years of experience, including the last two focused primarily on CI/CD pipelines, test environments and build tooling. Owns CI pipelines and ephemeral test environments used by three product teams. Hands-on experience with Docker, Helm and namespace-level Kubernetes deployments, alongside personal projects using Terraform and GitOps. Moving toward a full-time DevOps or platform engineering role.

TECHNICAL SKILLS

Infrastructure & CI/CD: GitLab CI, Jenkins, Docker, Docker Compose, Helm, Kubernetes (namespace-level access; basic)
Infrastructure as Code & Platforms: Terraform (personal projects), k3s, Argo CD, Ansible (basic)
Monitoring & Security: Prometheus, Grafana, Loki, cert-manager, TLS certificates
Programming & Data: Python, Bash, Java (test code), SQL, PostgreSQL
Testing: pytest, Playwright, Selenium, Postman
Systems & Tools: Linux, Git, AWS (learning: EC2 and S3 basics)

PROFESSIONAL EXPERIENCE

QA Automation Engineer (Test Infrastructure) | Odrava Health Software, Wroclaw *2021–Present*

- Own GitLab CI pipelines for three product teams (~25 developers), covering build, unit, integration and end-to-end test stages, as well as artifact publishing.
- Reduced average pipeline duration from 38 to 14 minutes by parallelising test jobs, caching dependencies and separating end-to-end tests into their own stage; monthly CI runner costs fell by about 30%.
- Built short-lived merge-request environments for applications, PostgreSQL and seeded data, deployed through GitLab CI and Helm to a shared Kubernetes cluster; environments are removed after merge or 48 hours of inactivity.
- Enable QA and product teams to review changes before merge, with end-to-end tests running against the ephemeral environments.
- Maintain a pytest and Playwright end-to-end suite of approximately 900 tests; reduced the flaky test rate from 7% to below 1%.
- Wrote Bash and Python tooling for PostgreSQL test-data seeding and collected CI test results into PostgreSQL for Grafana flaky-test dashboards.
- Wrote an internal guide to CI pipelines used in onboarding; mentored two QA interns in 2023.

QA Engineer | Brightmill Software House, Wroclaw *2019–2021*

- Performed manual and automated testing of web and mobile applications for client projects.
- Introduced a Java and Selenium automated regression suite for the largest client project.
- Configured Jenkins jobs for nightly regression runs.

SELECTED INFRASTRUCTURE PROJECTS

Homelab k3s Cluster with GitOps | Personal *2024–2025*

- Built a three-node Raspberry Pi 5 k3s cluster, with applications deployed from a Git repository using Argo CD.
- Set up Prometheus, Grafana and Loki monitoring, Traefik ingress and cert-manager for TLS.
- Provisioned infrastructure for a small Hetzner VPS with Terraform; used Ansible at a basic level.

Merge-Request Ephemeral Environments | Odrava Health *2023–2024*

- Delivered short-lived application and PostgreSQL environments with seeded data, deployed through Helm to a shared Kubernetes cluster from GitLab CI.
- Automated environment cleanup after merge or 48 hours of inactivity, enabling feature reviews and end-to-end testing before merge.

CI Pipeline Speed-up | Odrava Health *2022*

- Profiled pipelines across three teams, parallelised test jobs, added dependency caching and split end-to-end tests into a separate stage.
- Reduced average pipeline time from 38 to 14 minutes and monthly CI runner costs by about 30%.

EDUCATION & CERTIFICATIONS

BEng, Computer Engineering | Silesian Lowlands University of Technology | 2018
ISTQB Foundation Level | 2019
Certified Kubernetes Administrator (CKA) exam scheduled for January 2027
